

THEOFANIS TOMPOLIS

Nicosia, Cyprus | +357 97795999 | fanostompolis97@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFILE

Final-year Computer Science & Engineering student with hands-on experience building and maintaining full-stack web applications. Experienced with React 19, TypeScript, ASP.NET Core (.NET 10), Java/Spring Boot, Python/Flask, SQL/MySQL, REST APIs, and SignalR. Comfortable working across frontend, backend, databases, testing, debugging, and Git-based delivery workflows in production-oriented projects.

TECHNICAL SKILLS

Frontend: React 19, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, Material UI (MUI), Headless UI

Backend: C#, ASP.NET Core (.NET 10), REST APIs, SignalR, Java, Spring Boot, Python, Flask

Databases: SQL, MySQL, Azure Data Studio

Testing & Tools: xUnit, Moq/NSubstitute, FluentAssertions, Jest/Vitest, React Testing Library, pytest, JUnit 5, Mockito, Playwright/Cypress, Git/GitHub, GitHub Actions CI, Docker, Linux

EXPERIENCE

Full-Stack Developer | Footygreece

Dec 2025 - Sep 2026

Ioannina, Greece · Remote

- Developed and maintained production features across a multi-application React 19/TypeScript and ASP.NET Core (.NET 10) platform, working within a clean layered architecture.
- Built responsive user flows and reusable frontend components, integrating REST APIs and SignalR for real-time functionality, validation, and role-aware behavior.
- Worked across backend and data layers to support APIs, business logic, and SQL-driven features; investigated issues with browser tools, REST APIs, SQL, and Azure Data Studio.
- Collaborated through Git/GitHub, code reviews, and CI workflows, with unit, component, integration, and E2E tests supporting reliable releases.

SELECTED PROJECTS

Biblio-Explorer - Bibliographic Analytics Platform

JavaScript | Flask | MySQL | pytest | [GitHub](#)

- Built a Flask/MySQL bibliographic analytics platform with REST APIs and data workflows across 2.5M+ publication records, including ETL, venue matching, validation, and error handling.
- Maintained 111 automated pytest tests and GitHub Actions CI with pytest/flake8, covering API contracts, data integrity, edge cases, failure paths, and responsive behavior.

Traineeship Management Web App

Java 17 | Spring Boot | MySQL | JUnit 5 | Mockito | [GitHub](#)

- Developed a multi-role application with authentication, RBAC, placement matching, logbooks, and evaluation workflows, including role-specific behavior and business rules.
- Implemented and tested controller/service workflows and persistence interactions, supported by 70 JUnit 5/Mockito tests across authentication, assignments, search strategies, and business rules.

Food Hazard Detection Challenge

Python | scikit-learn | TF-IDF | LinearSVC | NLP | [GitHub](#)

- Built a text-classification system for SemEval-2025 Task 9 to predict food hazard and product categories from recall reports, reaching a final Subtask 1 score of 0.78003.
- Developed and compared NLP pipelines using word/character TF-IDF, LinearSVC, title boosting, country features, and a DistilBERT baseline for an imbalanced multi-class dataset.

EDUCATION

Integrated Master's Degree in Computer Science & Engineering

Final-year student | Expected 2027

University of Ioannina, Greece

LANGUAGES & AVAILABILITY

Greek (Native) | English (B2 - Upper-Intermediate) | Available full-time
